Subject: TCE Agency Workgroup Meeting Follow-up
Attachments: 2021-02-25--TCE-RM-Agency-WG-Meeting-Notes.docx; Template_TCE Preliminary Options_Occupational and Consumer_WG comments_2.11.21.docx

Hi everyone,

Here are the notes from last week, and a few follow-up items below, please let me know if you have any questions and always feel free to reach out to Victoria and I.

- Early Guidance and Analytical Blueprint
 - OPPT has not yet reached out to your respective office directors given the current status of the review of the TSCA process and proceedings, please let me know who the appropriate person is that should be informed (OD or IO) and I will try to keep you updated.
- Kansas State Roundtables (2017 - 2021) and Pollution Prevention (P2) Resources are available at <https://www.sbeap.org/p2/resources/tce>
 - 2021 recordings
 - Part 1 – Katie’s public webinar on TCE RE and TSCA Section 6 RM tools
 - Part 2 – Katy Wolf PPRC, Solvent testing and other resources (TURI), Update from aerospace industry, solvent reduction project (pollution prevention institute)
- TCE COU groupings regulatory options (**submit to Katie or upload to SharePoint by COB Tuesday 3/9**)
 - If you have not already started providing questions and comments from your respective office, the template is available on our [sharepoint](#) under options development in the workgroup comments folder [here](#) (also attached). Please follow suit to what we reviewed by OP during our meeting last Thursday, if you are not in OP please do not add to the OP template - create one ongoing/working document for your respective office. Even a high-level overview of your thoughts are helpful for Victoria and I to take into account what your considerations are. Like OECA had mentioned, their main concern will be enforcement issues (some of which are overarching issues being handled by others in my office), so please provide questions or comments that I should be thinking about now for TCE, or that I should be forwarding to those folks leading the overarching issues discussions, as we are still currently moving forward with the risk management action.
- I will keep you updated on the proceedings of leadership decisions as they are still currently reviewing the first 10 final risk evaluations and how to proceed.

Have a great rest of your week!

Katie McNamara

Environmental Protection Specialist, RMB1
Existing Chemicals Risk Management Division
